EDUCATION

The University of Texas at Austin **Austin, TX**
PhD in Operations Research and Industrial Engineering *Jan 2021 – Aug 2025 (expected)*
Thesis: Equity-Driven Resilience Planning under Uncertainty: Decision Models for Power Grids and Healthcare Systems. (*Advisors: Prof. John J. Hasenbein and Prof. Erhan Kutanoglu*)

The University of Texas at Austin **Austin, TX**
MS in Operations Research and Industrial Engineering *Jan 2021 – Dec 2023*

Stanford University and DeepLearning.AI **Online**
Machine Learning Specialization *Certification, 2023*

Bogazici University **Istanbul, Turkey**
BS in Civil Engineering (Highest Honors, ranked 3rd) *Aug 2008 – May 2013*
Thesis: Optimizing Wind Energy and Storage: A Financial and Operational Investment Analysis

RESEARCH INTERESTS

Methodology:
- Integer programming, Network optimization
- Stochastic programming, Robust optimization

Applications:
- Infrastructure resilience to extreme events
- Equitable resource allocation and investment planning
- Disaster mitigation, preparedness, response, and recovery
- Healthcare networks and power systems/electric grids
- Interdisciplinary research to address complex social and policy challenges.

PUBLICATIONS

Published Journal Papers:

- Impact of Power Outages Depends on Who Loses It: Equity-informed Grid Resilience Planning via Stochastic Optimization, *Socio-Economic Planning Sciences, 2024*. Full article link

  (with John J. Hasenbein and Erhan Kutanoglu, University of Texas at Austin).

- A Stochastic Optimization Model for Patient Evacuation from Health Care Facilities During Hurricanes, *International Journal of Disaster Risk Reduction, 2024*. Full article link

  (with Kyoung Yoon Kim, Amazon Science; John J. Hasenbein and Erhan Kutanoglu, University of Texas at Austin).

Conference Papers:

- Scenario-based Optimization Model for Long-term Healthcare Infrastructure Resilience against Flooding, *Institute of Industrial and Systems Engineers (IISE) Annual Conference. Proceedings, 2022*.

Full article link

(with John J. Hasenbein and Erhan Kutanoglu, University of Texas at Austin).

Work in Preparation:

- From Vulnerability to Social Burden: An Equity Index Generator for Disaster Preparedness, Target Journal Submission: *Nature Climate Change, in 2025*.

  (with John J. Hasenbein and Erhan Kutanoglu, University of Texas at Austin).

- Critical Decisions: Mitigate Now or Evacuate Later? Preparing Healthcare Facilities for Urban Disasters, Target Journal Submission: *Sustainable Cities and Society, in 2025*.

  (with John J. Hasenbein and Erhan Kutanoglu, University of Texas at Austin).

RESEARCH AND INDUSTRY EXPERIENCE

The University of Texas at Austin **Austin, TX**

Doctoral Research Assistant *Jan 2021 – present*

IC^2 Institute-funded research

- Developed a two-stage stochastic integer programming model for disaster mitigation investments in transmission grids, with a focus on substation hardening.
- Created equity metrics to incorporate the uneven impacts of prolonged power outages on socially vulnerable communities.
- Formulated equity-informed models and a justice model inspired by the U.S. government's Justice40 Initiative.
- Conducted a case study on the Texas grid's resilience during hurricane-induced flooding.

National Science Foundation (NSF)-funded research

- Developed a two-stage stochastic integer programming model for staging area location(s) and resource allocation, considering the uncertainty in patient evacuation needs due to the uncertain landfall and precipitation of an emerging hurricane.
- Integrated the decision-making model with physics-based hydrological models for inland flooding and storm surge.
- Conducted a case study on Hurricane Harvey's impact on the Texas coastline.

Bureau of Economic Geology - Comparing Electricity Options (CEO) project

- Developed a mixed-integer programming (MIP) model for capacity expansion planning to optimize the future energy mix, ensuring grid reliability under energy transition scenarios with the gradual integration of wind, solar, and battery storage technologies.

National Renewable Energy Laboratory (NREL) **Golden, CO**

Ph.D. Research Intern *May 2024 – August 2024*

- Contributed to a project optimizing electric vehicle managed charging (EVMC) to improve bulk power grid reliability, affordability, and decarbonization.
- Assisted in integrating EVMC into ReEDS, NREL's flagship capacity planning model (MIP-based), and validated it using load profiles and charging flexibility data from the TEMPO model.
- Developed scripts for translating TEMPO data to ReEDS format and generating interpretable outputs from optimal solutions and constraint marginals.
- Collaborated with a large, distributed team while adhering to coding standards, leveraging version control tools like Git and GitHub for code development and management.
- Utilized High-Performance Computing (HPC), working remotely with cloud-based infrastructure.

GISEMAI **Ankara, Turkey**

Founder *Jan 2018 – Dec 2020*

- Led an e-commerce startup, managing global logistics, supply chain management, and operations.
- Applied inventory management techniques, including *just-in-time* and the *newsvendor* model, to ensure effective stock control and demand forecasting.
- Managed end-to-end processes, from manufacturing in China to warehousing, sales, and delivery in the US and Canada.

CLK Energy Investment **Istanbul, Turkey**
Senior Strategic Planning Analyst *Jun 2015 – Nov 2017*

- Led a strategic planning team, collaborating with departments across the enterprise (trading, finance, onsite technical teams).
- Developed and applied time series forecasting models to predict electricity demand, enabling data-driven strategic decisions.
- Led cross-functional initiatives to shape or inform the company's long-term plans and decisions.

ENERJISA **Istanbul, Turkey**
Key Account Manager *Sep 2013 – Mar 2014*

- Acquired and managed key accounts (high-electricity demand companies and industrial facilities) for Turkey's largest electricity generation and distribution company.
- Analyzed energy markets, negotiated high-value contracts, and collaborated with onsite technical teams to support key accounts in achieving optimal energy solutions.

HONORS AND AWARDS

- University Graduate Continuing Fellowship for outstanding academic accomplishments and a well-defined research agenda (2024-2025)
- IC^2 Institute Seed Grant, *Towards a Well-Being Economy: Advancing Equity in Social, Economic, and Health Systems* (2022-2023)
- NSF Award #1940308, *CoPe EAGER: Addressing Human-Centric Decision-Making Challenges from Coastal Hazards via Integrated Geosciences Modeling and Stochastic Optimization* (2021-2022)
- Graduated *summa cum laude* (with highest honors), B.S. (2013)
- Academic excellence scholarship for outstanding performance (2008-2013)

TEACHING EXPERIENCE

Department of Mechanical Engineering - Cockrell School of Engineering
Teaching Assistant for Engineering Statistics *Fall 2022*

- Upper-division course on probability, distribution theory, data analysis, statistics, interval estimation, hypothesis testing, and statistical quality control.
- Designed and led recitation classes, held weekly office hours, graded assignments and exams.
- Responsible for 25 students; Evaluation Score:

Department of IROM - McCombs School of Business
Teaching Assistant for Learning Structures & Time Series *Spring 2021*

- Graduate-level course on unsupervised machine learning (principal component analysis, cluster analysis, factor analysis) and time series forecasting (ARIMA, autoregression).
- Held weekly office hours and graded assignments and exams.
- Responsible for 105 students; Evaluation Score:

Talks

- Will present *Equity-informed Power Grid Resilience Planning via Stochastic Optimization*, INFORMS Annual Meeting, Seattle, October 2024 (Tuesday, October 22, from 12:45 PM to 2:00 PM in the Exhibit Hall)

- Presented *Power Grid Resilience Planning via Stochastic Optimization*, INFORMS Annual Meeting, Indianapolis, October 2022
- Presented *A Scenario-based Optimization Model for Long-term Healthcare Infrastructure Resilience against Flooding*, IISE Annual Conference, Seattle, May 2022
- Led annual seminars at CLK Energy Investment. Presented on electricity market developments to an audience managing 25% of Turkey's total electricity demand (2015, 2016, 2017).

PROFESSIONAL SERVICE

- Reviewer for *Applied Energy* and *IEEE Transactions on Energy Markets, Policy, and Regulation* (2023-present)
- Member of INFORMS and International Association for Energy Economics (IAEE)
- Chair of the Tenant Advisory Board for University Housing and Dining: Represent residents and organize community-building events in university apartments (2023-present)
- Organized the IAEE Eurasian Conferences in Nur-Sultan, Kazakhstan (2019); Baku, Azerbaijan (2016, 2018); Zagreb, Croatia (2017)
- Organized the IAEE Southeast Europe Symposium in Sofia, Bulgaria (2018) and Bucharest, Romania (2019)
- Assisted in organizing the East Med Energy Symposium for the Turkish Association for Energy Economics in Güzelyurt, Turkish Republic of Northern Cyprus (2019)
- Assisted in organizing the IAEE Middle East Symposium in Abu Dhabi, UAE (2019)
- Assisted in organizing the En.Economics & Industry Conference for the Slovenian Association for Energy Economics in Ljubljana, Slovenia (2016)
- Organized IAEE Summer Schools on Electricity Markets and Regulation in Istanbul, Turkey (2015, 2016)
- Assisted in organizing the 38th IAEE International Conference in Antalya, Turkey (2015)

SKILLS

Programming Languages: Python, R, MATLAB, SQL, GAMS

Optimization and Machine Learning Tools: Gurobi, CPLEX, IPOPT, TensorFlow, PyTorch, Keras, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

PERSONAL DETAILS

Languages: Turkish (native), English (fluent)

Citizenship: Turkey (Turkish Citizen)

Personal Interests: Engaging in daily exercise to unwind and stay focused, including walking, weight lifting, dancing, and various sports such as rowing, tennis, and snowboarding, depending on the time of year and location, as well as experimenting in the kitchen.
